FRANKIE DETTORI

Smart plates

These plates have worked wonders for my business. Automotive Repair Systems Ltd is a company that is contracted by national dealership groups, PLC brands and motor manufacturers, as well as private motorists, to carry out 'smart' repairs and painless dent removal.

Although our fleet is some sixty strong, I decided that, with my Audi and one of our office based vehicles, we would benefit from the advertisement.

Also being a Formula One (F1) fan, it goes hand in hand. The looks and comments I get are really quite overwhelming.
